MGMT 362e Project #1

Create a Business Home Page

Due 7 March 2003

You must upload the website to one of the teammates directories on the class' webserver and e-mail the location to me at ajaken@cba.siu.edu prior to the beginning of the lab on 7 March.

You will organize yourselves into teams of 3 or 4 members (a total of 4 teams in the class) to develop a home page for a business or organization. You will then develop a web page utilizing HTML and JavaScript for that business. The specific organization your team will develop the webpage for will be picked at random from a group of possible organizations on 7 February once your teams have been organized. It will be the team's responsibility to develop the site according to the requirements of that business of whom I will function as their liaison.

The team will receive a grade for the project and the individual team members will receive their grades based upon a variance of the project grade determined by a team evaluation form similar to the one below:

Team Evaluation Form: MGMT 362e

Project #1

7 March 2003 **Your Name:** _____

Instructions:
Percentage of the project completed by an individual is your opinion as to how much work or how much of the total project was completed by that individual. The percentages for all individuals need to total 100%.
Role in the project refers to which part of the assignment that person was responsible for completing. Additionally, if that person was the leader of the project, was responsible for submitting the project, or had any other function in completing the project, state that part of their responsibility as well.

Percentage of the project completed by yourself: _____%

Your role in the project: _____

_____

Team Member 1's Name: _____
