MGMT 362e Assignment #2

Create a Personal Home Page

Due 21 February 2003

You must upload the web page and any files required for the viewing of the web page to the class' web server at siu.globaleyes.com prior to the beginning of the class on 21 Feb.

Develop a homepage describing yourself (e.g. in the format of an on-line resume'). The webpage must include a picture of yourself, a background graphic, at least 2 links to other pages on this website (relative links) and 2 links to pages on other sites (absolute links). The links to other pages on this website do not need to resolve to pages that exist, yet. The external links must function correctly. Include a table on the webpage which provides contact information for yourself.

These are just the minimum requirements, you may have more content or other HTML constructs included on your site, but each of the minimum requirements must be met. The assignment will not only be graded based upon the completion of each of the above requirements but also upon the aesthetics of the presentation (e.g. make it look good).

Make sure that when you turn in the assignment, you include all files that are used by the webpage.
